Office Action Summary	Application No. 10/623,359	Applicant(s) CARIM, HATIM M.	
	Examiner Scott M. Getzow	Art Unit 3762	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5,7,9,10,12,14-16,18-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Ferrari (5824033).

Figure 2 of Ferrari shows a conductive polymeric sheet 21, a conductive undercoating 23, an electrolyte layer 25, a current spreading layer 27, and an electrical connector 36. The subject matter of claim 2 is considered to be inherent in the device of Ferrari. Re claim 12, the conductive adhesive tape is considered to be adhesive 34.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6,13,17,23-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ferrari.

The subject matter of claims 6,13,17 are considered to be design choices that the ordinary artisan would find obvious to make in order to design the device in the

Art Unit: 3762

most effective manner. Also, the steps of claims 23-35 would be found to be obvious when making the device of Ferrari.

5. Claims 11,22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ferrari in view of Itoh et al (5362420).

To use a hydrogel pressure sensitive adhesive, as shown by Itoh, would have been obvious since such has been shown to be effective in use in biomedical electrodes.

6. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ferrari in view of Axelgaard (5785040).

To use moisture barrier, as taught in Axelgaard (element 72), would have been obvious with the device of Ferrari since such protects the device from unwanted moisture which could disrupt operation of the electrode.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott M. Getzow whose telephone number is (571) 272-4946. The examiner can normally be reached on M-F, 9-5.
